

HOW TO ACE YOUR JOB INTERVIEW: 10 TIPS FROM KFS.

Landing a new job is no easy task. It takes hard work, dedication, and of course a little luck. You may only have one chance to make a first impression during your job interview. Therefore, it's important to make sure you are well-prepared and know what to expect. A job interview can be a nerve-wracking experience, but with the right preparation, it can also be a great opportunity to show a potential employer what you're made of.

There's no one-size-fits-all answer to this question, but here are a few general tips on how to ace your job interview:

DO YOUR RESEARCH

Find out as much as you can about the company and the position you're interviewing for. Before your interview, learn as much as you can about the company and the position you're applying for. This will help you come up with specific questions to ask during the interview and will show the interviewer that you're interested in the company and the job.

DRESS THE PART

Dress for success. It's always important to dress professionally for an interview, even if the company doesn't have a formal dress code. Make sure you wear something neat and tidy but also comfortable. Dress in something that makes you feel confident as this will put you in the right mindset throughout the interview.

The most important thing to remember in an interview is to believe in yourself, if you believe others will follow and you will be successful. If it doesn't go quite to plan learn from the experience and evolve your techniques going forward.

ARRIVE ON TIME

Always give yourself plenty of time to travel to your interview. This will alleviate any unnecessary stress and arriving a little early will show you are punctual and reliable.

HOW TO ACT

No doubt you will be nervous and that's totally normal but remember to smile and try to remain calm. They are people too and they know what it's like to be interviewed but they will be impressed with how you handle the situation. Stick to your point and don't ramble, speak clearly and concisely. Try to keep eye contact to show you are listening and interested in what they are saying. Most importantly be yourself.

WHAT TO BRING

It's a good idea to bring a copy of your CV so it is fresh in your mind should the interviewer refer to it. When researching the company, you should have made some notes, bring these along too so you can refer to them but try not to read from them directly as that can come across as robotic and rehearsed its best to remain natural. Bring any documentation the employer has requested such as qualifications, certificates, and ID such as your passport.

Good Luck!
